Floating Diver Communication Rope on Reel

- Cable Reel made of special rubber with 4-pole slip ring
- Attachment eyelet for diverside carabiner
- Connection cable for the communication unit, approx. 3 m long, routed from the rear of the reel hub
- Strain relief for the connection cable with swivel carabiner
- Cable winding option for the connection cable
- Maximum reel capacity: 80 m diver communication rope

Floating Diver Communication Rope

Floating Diver Communication Rope

- Meets the requirements of DGUV 102005, FwDV8, PDV 415
- **Floating**, approx. 13 mm diameter
- Minimal elongation, tensile strength approx. **18000 N**
- Stainlesssteel thimbles spliced into both ends, bindings protected with transparent heatshrink tubing
- **Length markings** every 10 m
- Underside connector: **4-pin HI-USE connector** or other customerspecific connectors, potted
- Surfaceside connector: according to customer requirements
- Rope construction: Dyneema® core, UVstabilised PP braided sheath, yellow with red identification threads, integrated highly flexible communication cable

Rope Bag

- Selfstanding rope bag made of waterproof tarpaulin material
- Two sizes: for up to 50 m and 80 m of rope
- Ensures mobility during diving operations

Adapter Cables

- Adapter cables **extend the usability** of existing diver communication ropes with communication units using different connector systems
- Adapter cable Aqua Lung / OTS MK7 to Dräger UTS402 unit
- Adapter cable Dräger UTS402 connector to Aqua Lung / OTSMK7 unit
- Aqua Lung / OTSMK7 to dual banana plug
- Adapter cable Dräger UTS402 connector to dual banana plug

Signal Ropes / Diver Safety Ropes

Floating Signal Rope 12 mm

- 1800 daN linear breaking load
- Very flexible and soft rope, braided without twist

Floating Signal Rope 10 mm

- 1300 daN linear breaking load
- Very flexible and soft rope, braided without twist

Custom Configuration

- Thimbles
- Length markings
